

FIBER TOOLS

OPTICAL FIBER PROTECTION BOX DROP FIBER REPAIR KIT

The Drop Fiber Repair Kit is used to facilitate repairs of fiber optic cables. Common fiber sizes of 8.1mm, 5.4mm and 5.1mm rectangular cables and 5.1mm round cables are accommodated with the supplied sealing gaskets. Both fusion splices (total of 12) and two mechanical splices are securely positioned within the IP68 rated enclosure. The enclosure can be permanently buried or mounted on the side of a building. Two DFR100 enclosures are typically used to repair a drop fiber as there is not enough slack cable to reconnect the fibers. The DFR100 can also be used as a demarcation point at the premises.

FEATURES:

- IP68 rated for buried applications
- Accommodates up to 14 fibers
- Individual gaskets for 8.1, 5.4 and 5.1 mm rectangular and 5.1mm round cable
- Fast assembly with common tools

INDIVIDUAL GASKET FOR EACH CABLE SIZE:

8.1mm Rectangular 5.4mm & 5.1mm Rectangular 5.1mm Round
