Visual Fault Locator

FIBERTEST™ VFL

Quickly Test Fiber Cables!

Applications

- Quickly identify fiber cables and test them for breaks, leakage (loss) at sharp bends, and defective connectors and splices

- Tests single, duplex, or multi fiber cables

- Locate faults near launch end, in OTDR's dead zone

Features

- Universal 2.5mm fitting for testing cables with ST, SC, and FC male connectors (Also identifies TOSLINK™ cables)

- Test single-mode or multi-mode cables

- Dust cap keeps connector clean and protected

- 5mW 650nm laser

- Machined aluminum housing

- Rotating collar to protect buttons

- Red "test in progress" indicator LED

- Works to 5 to 10km

- 3 different test signals; continuous wave, slow pulse, and rapid pulse

- Machined Aluminum housing
